# RECYCLING SPILL STATION ©

DEALS QUICKLY AND EFFECTIVELY WITH SPILLS  
THE RECYCLING SPILL STATION STORES AND  
RECYCLES THE ROSS ELIMINATOR ABSORBENT REFILL

Saturated lumps are retained on the sieve and the recyclable powder falls back into the storage bin. Spread Ross Eliminator Absorbent generously – any powder which is not saturated can be recovered.

## ▶ 4 GOOD REASONS TO CHOOSE THE RECYCLING SPILL STATION

### 1 EFFICIENT

*8 times more efficient*

- Instantaneous absorption
- No more oil film: safe and dry floors
- Upon saturation, the absorbent powder will form lumps

### 2 ECO-FRIENDLY

*Recyclable and reusable*

- A natural, fibre-based absorbent material
- Renewable and biodegradable
- Reusable: produces 8 times less waste
- Captures hydrocarbons and prevents infiltration into the ground

### 3 EASY TO USE

*All-in-one system, quick and easy*

- Mobile for emergency use
- All-in-one system: storage, distribution and recovery of Ross Eliminator Absorbent
- Recycling Spill Station provides all the tools you need for efficient operation

### 4 MONEY SAVER

*Stop waste*

- High-efficiency management of consumables: a product used to 100% of its capacity thanks to the sifter

#### EMERGENCY INTERVENTION

Move your absorbent material stock and tools effortlessly to the intervention site : have everything in your hands to rapidly and effectively deal with the spillage.

#### SIFTERING SYSTEM

Collects and recycles, by separating the soiled absorbent from the reusable one, that falls into the storage bin.

#### TRAPDOOR FACILITATING ACCESS TO THE ABSORBENT MATERIAL

The trapdoor offers easy access to the absorbent material stock. Once closed, the trapdoor seals the container.

#### ▶ PRINCIPLE OF USE

Stores and distributes

Absorbs

Recovers and recycles
