

LIQ-LOCK[®] Absorbent Technology

LIQ-LOCK[®] **Absorbent Technology**
Encapsulates liquids on contact

Ross Eliminator Multi Purpose Absorbent is made from lignocellulosic fibers which absorb oil and water based liquids, most chemicals and paints. Thanks to its micro-alveolated structure composed of lignocellulosic fibers, the **Ross Eliminator Multi Purpose Absorbent** encapsulates and prevents leaching of contaminated liquids up to saturation point, absorbing up to 8 times more liquid spillages than Clay type products.

Not for use on Acids. Please view our **RACX Acid Neutralizer**.
